

SOLIS 60FA

Operating lamps from the **SOLIS 60FA** series are dedicated to treatment rooms, dental offices, gynecological offices and veterinary clinics, but they can also be used in hospital emergency departments (ERs), intensive care units (ICU) and for minor surgical procedures.

The **SOLIS 60FA** light source features a module with **18 LEDs**, capable of delivering a robust **65,000 lux** illumination. This advanced design also ensures exceptional longevity, with a projected operational lifespan **over 60,000 hours**, offering extended reliability and reduced maintenance.

The dome, constructed from high-heat-resistant plastic, ensuring both exceptional mechanical strength and long-term durability. Its seamless, uniform surface, designed without visible fasteners, **facilitates effortless cleaning with disinfectants.**

Users can precisely position the lamp using **the sterile handle** located at the bottom of the dome, which also offers **light intensity adjustment.** A supplementary non-sterile handle provides additional assistance for dome positioning.

SOLIS 60FA

NEW TECHNOLOGIES IN GOOD LIGHT

Power supply	100 -240 V AC, 50 -60 Hz
Power voltage	24 V DC
Light intensity at distance of 1 m.	65 000 lux
Range of light intensity adjustment	50 -100%
Colour rendering index Ra	96
Colour temperature	4400 K
Operating field diameter D10	25 cm
Operating field diameter D50	13 cm
Temperature increase near surgeon`s head	<1°C
Illumination depth L1+L2	120 cm (60%) 194 cm (20%)
Power consumption	60W
Batteries durability	~6h
